PROFESSIONAL SUMMARY

I am eager to learn new technologies. I am looking for opportunities such as internships or training programs where I can gain practical experience, learn from professionals, and contribute with sincerity and commitment for future professional roles. I am passionate about gaining knowledge about AI, ML & DL and staying updated with industry trends. I am highly motivated to learn new technologies, work on practical projects, and gain real-world experience through internships. My goal is to grow as a skilled software professional and contribute to innovative and meaningful tech solutions in the future.

TECHNICAL SKILLS

- Programming: C, C++, Python for Beginners
- Concepts: Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA), File Handling, Debugging, Problem Solving
- Web Development: HTML, CSS (learned recently), basics of JavaScript (currently learning)
- Fundamental knowledge of AI, ML & DL
- Generative AI Essentials / Studio
- AI and Cybersecurity Awareness
- Tools: MS Excel, VS Code, Git

PROJECTS

• Simple Calculator (HTML, CSS, JavaScript):

1. Built a clean, user-friendly, and responsive calculator supporting standard arithmetic operations (addition, subtraction, multiplication, division, percentage, and decimals).
2. Implemented dynamic functional features including clear (C) and backspace capabilities using modular JavaScript.
3. Structured the application using index.html and styled the UI using custom style.css layouts; deployed and hosted live on GitHub Pages.

• Snake Water Gun Game (Python)

1. Developed a CLI-based interactive Python mini-game allowing users to play against an AI opponent based on classic game rules.
2. Implemented decision-making logic using Python dictionaries, conditional statements, and the built-in random module for automated computer choices.
3. Structured cleanly for easy execution via command line with interactive prompts (s, w, g) and error/draw handling.

• Number Guessing Game (Python)

1. Created a logic-building Python project where the system generates a random secret number between 1 and 100 for the user to guess.
2. Implemented dynamic feedback logic (hints like "Too Low" / "Too High") using loops, conditional flows, and dynamic random number generation.
3. Leveraged user input parsing, exception handling, and robust game logic to ensure continuous, error-free execution until solved.

EDUCATION

· Bachelor of Computer Applications (BCA) | 2024 · 2027

Harish Chandra Post Graduate College (MGKVP)

Current Percentage: 73.7%

· Intermediate (12th) | 2023 · 2024

Balvidyalaya Madhyamik School

Percentage: 70.1%

· High School (10th) | 2021 · 2022

Balvidyalaya Madhyamik School

Percentage: 79%

TRAINING & CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 · AI Foundation Associate (Certified)
- Deloitte forage - Technology Job Simulation
- tcs ion - Generative AI Essentials
- tcs ion - AI and Cybersecurity Awareness
- Oneroadmap - Data Analyst
- Microsoft Excel · Certification Program

SOFT SKILLS

- | | | |
|-------------------|-----------------------------|------------------------------|
| · Problem Solving | · Analytical Thinking | · Positive Learning Attitude |
| · Quick Learner | · Good Communication Skills | · Teamwork and Collaboration |

PROGRAMS

· Infosys Springboard Virtual Internship 7.0

Artificial Intelligence training program - Completed a comprehensive curriculum including Introduction to Data Science, Artificial Intelligence, Natural Language Processing, Deep Learning, Computer Vision, Robotic Process Automation, and Generative AI. Gained foundational understanding of OpenAI GPT models, prompt engineering, and agile & scrum practices, with a focus on practical and industry-relevant AI concepts.
